IoT²BRK3V3iSIM

BG773A LTE-M/NB1/2 Breakout Board

IoT²BRK3V3iSIM is the simplest way to add cellular connectivity and GNSS to your application. It is based on the ultra-compact LTE cat M1/cat NB1/NB2 bands and integrated SIM (iSIM) BG773A module. This 1-inch square board comes with an on-board GNSS low-noise amplifier front-end with integrated pre and post SAW filters and a GNSS ceramic antenna. External active and passive GNSS antennas can be used via the U.FL connector. The BG773A is an ultra-compact LPWA module supporting LTE Cat M1, LTE Cat NB1/NB2 and integrated GNSS. It is fully compliant with 3GPP Rel-14 specification and provides maximum data rates of 588 kbps downlink and 1119 kbps uplink. It features ultra-low power consumption implemented by the MIPS 5150 processor and integrated RAM and flash, which help reduce current consumption to low levels in various modes, including PSM, eDRX etc.
